

USING THE SLACK APP

- **Add the Wishlist App**
 - Under the Apps section, click + to browse and search for Wishlist.
 - Click the Wishlist App to add

COMMANDS

- **/recognize**
 - Using the Wishlist App under the Apps section or your company's recognition channel, use the following command to recognize your peers
 - Start by using command /recognize and follow the command with entering @user (name) or multiple users (ex. /recognize @user1 @user2 @user3)
 - Hit enter
 - Once submitted, a module will appear where you can choose a Core Value and enter a recognition message
 - Click Recognize
 - The post will now be visible in the Channel for all to see
- **/reward**
 - To reward someone type /reward @user
 - Once submitted, a module will appear to select the reward value and add a reward message
 - The reward will be sent to the user's email and will not be visible in the selected channel

NOTIFICATIONS & DIRECT MESSAGES

- Notifications sent to the selected channel
 - All Recognitions and Kinectons
 - All posts have deep links connecting directly to the browser version of the platform
- Direct messages sent to the user's app
 - When the user is Recognized/Kinected
 - You can Kinect other peers to the recognition from the direct message
